# istio重写

```
apiVersion: networking.istio.io/v1alpha3
kind: Gateway
metadata:
  name: bookinfo-gateway
spec:
  selector:
    istio: ingressgateway # use istio default controller
  servers:
  - port:
      number: 80
      name: http
      protocol: HTTP
    hosts:
    - "istiobook.kaikeba.com"
---
apiVersion: networking.istio.io/v1alpha3
kind: VirtualService
metadata:
  name: bookinfo
spec:
  hosts:
  - "istiobook.kaikeba.com"
  gateways:
  - bookinfo-gateway
  http:
  - match:
    - uri:
        prefix: /redirect #访问到istiobook.kaikeba.com域名的服务转到
productpage，如果后面加后缀/redirect则rewrite跳转到httpbind的/访问下。
    rewrite:
      uri: /
    route:
    - destination:
        host: httpbin
  - route:
    - destination:
        host: productpage
```

```yaml
port:
  number: 9080
```
